

Need to provide connection string in program.cs

Credentials Table:

create table Credentials (Username varchar(20) primary key, Password varchar(20) ,IsAdmin bit not null);

Insert into Credentials values('dj','dj',1);

*Values or on based user choice but last coloum must 1 so that it gave admin power to user.

Employee Table

create table Employee (EmpID int primary key, EmpFname varchar(50) not null,EmpLname varchar(50) ,username varchar(20) not null,Position varchar(20),DOJ date not null,Mobile varchar(10), EmailID varchar(50),Salary float,DailyWages float);

Insert into Employee [values\(1,'Dheeraj','kumar','dj','Intern','2022-01-10','8294730108','dheeraj.kumar@watchguard.com',25000,25000\)](#);

*Values or on based user choice .

Need to Create a another Database for the 2nd company:-

Credentials Table:

create table Credentials (Username varchar(20) primary key, Password varchar(20) ,IsAdmin bit not null);

Insert into Credentials values('dj','dj',1);

*Values or on based user choice but last coloum must 1 so that it gave admin power to user.

Employee Table

create table Employee (EmpID int primary key, EmpFname varchar(50) not null,EmpLname varchar(50) ,username varchar(20) not null,Position varchar(20),DOJ date not null,Mobile varchar(10), EmailID varchar(50),Salary float,DailyWages float);

Insert into Employee [values\(1,'Dheeraj','kumar','dj','Intern','2022-01-10','8294730108','dheeraj.kumar@watchguard.com',25000,25000\)](#);

*Values or on based user choice .
